

Interim MRF Supervisor's monthly report December 2nd 2015

The Month of November was unseasonably warm and steady, the jobs done by Greg and I include:

- Accepting incoming garbage
- Receiving recyclables
- Sorting recyclables
- Baling recyclables
- Crushing glass
- Continuing work with haz-mat
- Working on scrap metal
- Blading/grading MRF road in preparation of winter
- Smashing demo and metal boxes
- Working on equipment
- Separating old paint/stain
- Processing electronics
- Continuing efforts on the new exchange building
- Phone calls/e-mails/paperwork
- Cleaning and organizing the office and shop area
- Plus our daily routine

Adittitonal info:

1. Greg put in a lot of time and energy on the old exchange building cleaning, organizing and filling it full of bales of the various plastics and tin. This protects the bales from the elements and UV degradation and allows us to offer a more market friendly end product.
2. We shipped out 35 bales of aluminum to Chicago iron along with some cardboard and are awaiting a check from them
3. Greg did one last Greenlights recycling run of just under 1,200 fluorescent bulbs of various shapes and sizes
4. Bob Germer from the DNR payed us a visit and found the MRF to be up to and above standard. He also gave me some ideas for improvement in the future
5. We are shipping out a very large load of car/truck/boat/etc. Batteries today to Chicago iron for which there will be some reimbursement

Last but not least thank you all for your support,encouragement and compliments during my time as interim Supervisor

Respectfully submitted,

Carey Baxter Interim MRF Supervisor
